11 1/2" Wide

3 1/2" Deep

At **Newport Audio**, we design, engineer and manufacture all of our proprietary drivers, crossovers and tuned enclosures. All of our Newport Audio loudspeakers are engineered to deliver acoustically accurate audiophile sound at very low and ultra high volume levels!

Newport Audio GOLD SERIES loudspeakers incorporate world class crossover components and the best Poly-Mica drivers available. Our proprietary voice coil and crossover technologies can handle both low and ultra high power demands while delivering acoustically accurate audiophile sound.

- Upgraded custom engineered Poly-Mica drivers provide greater power handling which delivers increased accuracy, speed and low frequency extension
- Aluminum alloy baffle for increased rigidity, which leads to greater performance and less distortion
- Upgraded custom crossover for increased dynamics, clarity, and power handling
- Flat magnetic grill for the best looking speaker in the industry
- Metal ears that don't snap off provide greater ease of installation and long-term durability
- On-board crossover compensation for placement flexibility (settings for 0/1/2 boundaries)
- Includes both white and black scrims for painting flexibility
- Weather resistant design and aluminum baffle allows indoor and outdoor placement
